2024/2025

A Hungaria Karnis Kft. több, mint 25 éve van jelen a hazai és nemzetközi függönykarnis piacon, mint az egyik legnagyobb kínálatot felvonultató gyártó és kereskedő. Cégünk 2002 óta 100%-ban magyar tulajdonú.

Termékeink között megtalálhatóak a következő átmérőjű karnisok: 9 mm, 12 mm, 16 mm, 19 mm, 25 mm és 28 mm. Kínálatunkban válogathatnak fém, fa, acél, alumínium és műanyag megoldások között.

A komplett szettek mellett szortimentünk fontos részei a kiegészítők is, mint például a függönyelhúzó pálcák, csipeszek, ráncolókampók vagy függönyelkötő kampók és dekorációs kiegészítők. Forgalmazunk továbbá különböző profilú műanyag és alumínium mennyezeti síneket, illetve rolókat és üvegfóliákat is.

Megtiszteltetés számunkra, hogy kereskedelmi vonalon együttműködő partnereink között tarthatunk számon jelentős európai vállalatokat is Németországban, Horvátországban, Szerbiában, Bosznia Hercegovinában, Szlovéniában, Montenegróban, Romániában és Szlovákiában.

Hungaria Karnis Kft. has been present on the domestic and international curtain rails market for more than 25 years as one of the largest manufacturers and traders offering a wide range of products. Our company is 100% Hungarian owned since 2002.

Our products include the following diameters: 9 mm, 12 mm, 16 mm, 19 mm, 25 mm and 28 mm. We offer metal, wood, steel, aluminium and plastic solutions.

In addition to complete sets, accessories such as curtain rails, clips, curtain hooks or curtain tie hooks and decorative accessories are also an important part of our range. We also sell ceiling rails in various profiles, plastic and aluminium, as well as roller blinds and glass film.

We are also honoured to have major European companies in Germany, Croatia, Serbia, Bosnia and Herzegovina, Slovenia, Montenegro, Romania and Slovakia as our commercial partners.

Milyen karnist válasszak?

A megfelelő karnis kiválasztásánál több tényezőt is érdemes figyelembe venni.

Fontos átgondolni, hogy milyen funkciót szánunk a függönynek.

Amennyiben a cél csak az árnyékolás, abban az esetben elegendő az egysoros változat.

Ha sötétítésre és árnyékolásra is szükség van, akkor a kétsoros karnisokat ajánljuk.

Minél nehezebb, merevebb drapériát választunk, érdemes annál vastagabb átmérőjű karnisban gondolkoznunk.

A karnis hosszát a nyílászáró és a hely szélessége határozza meg. Ez általában az ablakkeret szélességénél 30 cm-el hosszabb karnist jelent, melynek 2 végén helyezkednek el a végzárók.

A tartó kiválasztásánál az elsődleges szempont, hogy az ablak és a mennyezet között mekkora hely áll rendelkezésünkre. Ha ez a hely túl kicsi, abban az esetben mindenképp válasszunk plafontartót.

Which cornice should I choose?

There are several factors to consider when choosing the right cornice.

It is important to consider what function we intend for the curtain.

If the goal is shading only, then a single line version is enough.

If shading is required, we recommend double cornices.

For heavier, stiffer drapes, the thicker cornice is worth thinking about.

The length of the cornice is determined by the width of the doors and windows. This usually means a 30 cm longer cornice with 2 finials from the window frame.

The primary consideration when choosing a bracket is how much space is available between the window and the ceiling.

If this space is too small, be sure to choose a ceiling bracket.

Milyen rolót válasszak?

A szoba fókuszpontja az ablak, ezért az árnyékolónak egyszerre praktikusnak és dekoratívnak is kell lennie.

A roló kiválasztása mindig nehéz dolog, azonban csak néhány alapvető kritériumot kell figyelembe venni ahhoz, hogy megtaláljuk az igazit.

Fontos előre eldönteni, hogy a szobában mennyi fényre van szükségünk.

Ha hálósobába vásárolunk rolót, érdemes a sötétített variációt választani. Ez a típus teljesen kizárja a fényt, így jobban tudunk pihenni, illetve a szoba is „kuckósabbá” válik.

Ha közös helyiségbe, például konyhába keresünk árnyékolót érdemes a fényáteresztő vagy a sávós rolókat választanunk. Azon kívül, hogy engedi megcsillanni a fényt, a kíváncsi tekinteteket sem engedi be otthonunkba.

A méret kiválasztásánál egyszerűen csak az ablak üvegméretét kell lemérnünk. Rolóink mérete a teljes szerkezet nagyságát jelenti, így a vászon méret 4 cm-el kisebb. Ha tehát az ablaküvegünk 76 cm széles, akkor a 80 cm-es rolóra van szükségünk.

Which rollo should I choose?

The focus of the room is the window, so the shade should be both practical and decorative.

Selecting a rollo is always difficult, but there are only a few basic criteria to consider to find the right type.

It is important to decide in advance how much light we need in the room.

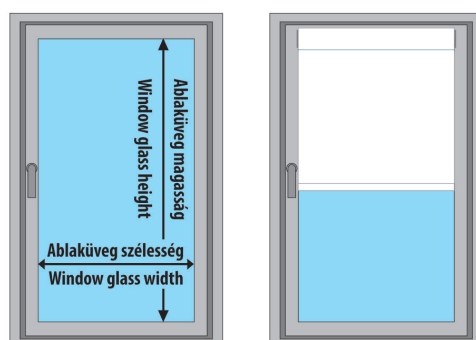

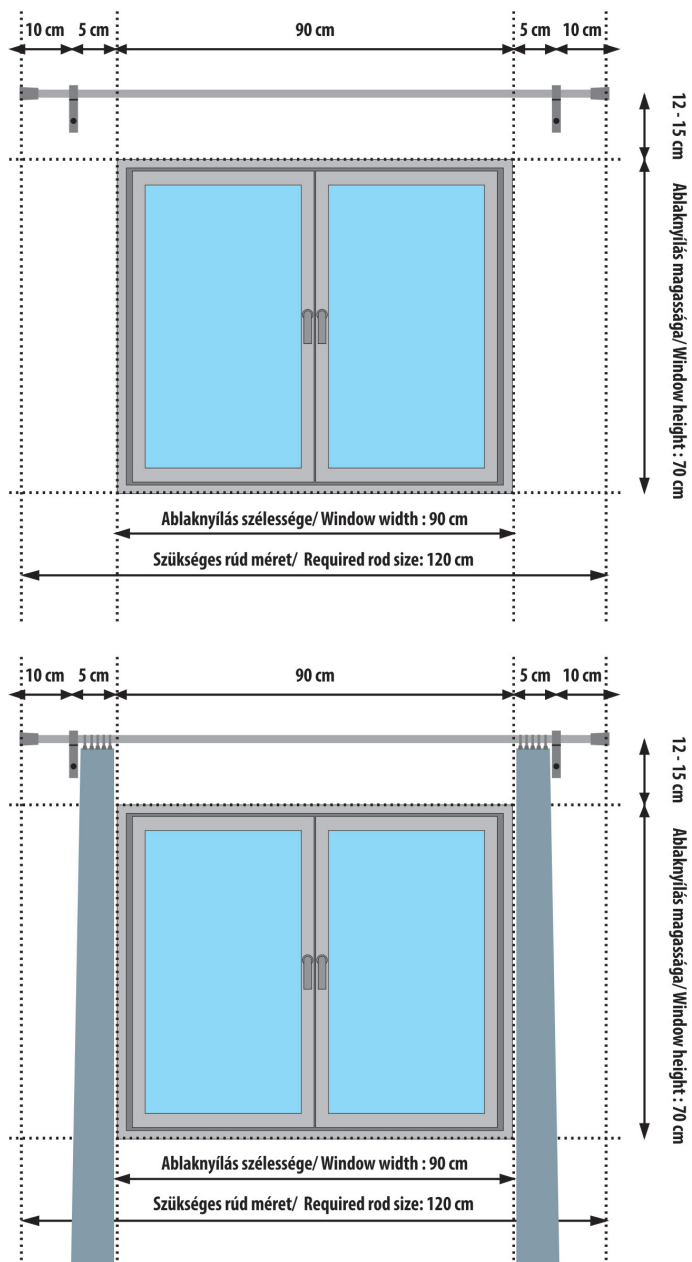

When buying blinds for a bedroom, it is worth choosing the Blackout version. This type completely excludes the light, so we can relax and the room becomes more "cozy".

If you are looking for a rollo in a public room, such as a kitchen, you may want to choose Daylight or Duo rollo.

Aside from allowing the light to shine, it does not allow curious glances into our home.

When choosing a size, simply measure the glass size of the window. The size of our blinds is the size of the entire structure, so the screen size is 4 cm smaller. So if your window glass is 76 cm wide, you need a 80 cm blind.
